

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

LIBRARY

## LETTER OF TRANSMITTAL

---

DEPARTMENT OF PUBLIC INSTRUCTION,

MADISON, WIS., December 31, 1914.

HON. FRANCIS E. MCGOVERN,

*Governor of Wisconsin.*

SIR:—I have the honor to submit herewith, as required by law, the Sixteenth Biennial Report of the Department of Public Instruction.

I am,

Very respectfully yours,

C. P. CARY,

*State Superintendent.*

# SIXTEENTH BIENNIAL REPORT

OF THE

## Department of Public Instruction

---

MADISON, WIS., December 31, 1914.

*To the Legislature of Wisconsin:—*

The close of the biennial period in the administration of state affairs, is made by law, the occasion of submitting to your honorable body a report by the State Superintendent of Public Instruction, setting forth the general condition of the public school system of the state during that period. I have the honor to submit herewith my report for the biennial period ending June 30, 1914, through His Excellency, the Governor of the State.

C. P. CARY,

*State Superintendent.*

## DEPARTMENT OF EDUCATION

---

### C. P. CARY, State Superintendent

J. B. BORDEN.....	Asst. State Superintendent
WARREN E. HICKS.....	Asst. for Ind't Education
CHAS. L. HARPER.....	Chief Clerk
O. S. RICE.....	Library Clerk
BERTHA BERGOLD.....	Asst. Library Clerk
WINONA MERRICK.....	Dip. and Certificate Clerk
BESSIE BURKE.....	Stenographer
DOROTHY CASEY.....	Stenographer
FLORENCE HOWARD.....	Stenographer
VLASTA STUPECKY.....	Stenographer

WALTER H. HUNT.....	State School Inspector
W. T. ANDERSON.....	State School Inspector
WALTER E. LARSON.....	Inspector of Rural Schools
A. A. THOMSON.....	Inspector of Rural Schools
ANNIE REYNOLDS.....	School Inspector
AMY BRONSKY.....	School Inspector

---

### BOARD OF EXAMINERS.

A. A. UPHAM.....	Whitewater
C. F. VIEBAHN.....	Watertown
W. A. SCOTT.....	Madison

---

### COMMITTEE ON INSTITUTES, BOARD OF REGENTS, STATE NORMAL SCHOOLS.

C. P. CARY.....	State Superintendent
THEODORA YOUMANS.....	Waukesha
EDWARD DEMPSEY.....	Oshkosh

A word of explanation may be in place with reference to the contents of this Biennial Report. It has been customary in the past to prepare reading matter that would show the progress that has been made in the different departments of education. A recent law has, however, limited the number of pages that may be in the Biennial Report of the State Superintendent of Public Instruction. It has been deemed best to eliminate discussion rather than statistics. This fact will account for the absence of such discussions as have heretofore occupied a considerable portion of the Biennial Report.

12—S. P. I

Madison, Wisconsin, June 30, 1914.

To Honorable O. P. Cary,

*State Superintendent of Public Instruction.*

The board of trustees of the Teachers' Insurance and Retirement Fund herewith submits its report for the three years ending June 30, 1914. (It has been thought best to include the 1911-'12 report as no previous report has been published.)

The board of trustees wishes to express its gratitude to the teachers, clerks, treasurers and superintendents for their hearty coöperation.

An effort is being made to simplify reports in every way possible consistent with the proper administration of the law.

As the law is becoming better understood there is coming to be a decided change in the attitude of teachers (especially young teachers) toward the compulsory feature.

Many for whom the law was elective and who did not elect to come under its provisions have expressed regret that they did not make application before September 1, 1912, the time provided for in the law.

Many new teachers for whom the law was compulsory, not understanding the law fully and fearing they might not be included, have made application.

The statistics for the first year, fiscal year ending June 30, 1912, are not as complete as we could wish, as the law was new and the reports in many cases quite inaccurate.

Number of teachers for whom the law was elective and who made application to come under the law before September 1, 1912.....	2,168
Number of teachers for whom the law was elective and who did not elect to come under the law .....	7,000
Number of teachers contributing to the fund during the school year ending June 30, 1913 .....	7,575
Number of teachers contributing to the fund for the year ending June 30, 1914...	9,000
Number becoming annuitants during the year ending June 30, 1913:	
Men .....	14
Women .....	59
Number of annuitants returning to school work September, 1913:	
Men .....	1
Women .....	3
Number becoming annuitants during the year ending June 30, 1914:	
Men .....	7
Women .....	42
Number receiving maximum annuity (\$450):	
Men .....	4
Women .....	15
Number receiving minimum annuity (\$312.50):	
Men .....	2
Women .....	6
Average of all annuities granted.....	\$308.80
Number of annuitants who retired from city schools.....	70
Number of annuitants who retired from rural schools.....	52
Number of annuitants who did all their teaching in city schools.....	12
Number of annuitants who did all their teaching in rural schools.....	32
Number of refunds granted during the year ending June 30, 1913:	
Men .....	12
Women .....	8
Number of refunds granted during the year ending June 30, 1914:	
Men .....	37
Women .....	70

## GENERAL SUMMARY.

CENSUS.		1912-13.	1913-14.
Number between 4 and 20 reported in the state:			
Cities: Boys .....		157,111	162,476
Girls .....		157,592	162,789
Total for cities.....		314,703	325,265
Counties: Boys .....		233,113	234,210
Girls .....		222,421	222,771
Total for counties.....		455,534	456,981
Total number between 4 and 20.....		770,237	782,246
Number between 7 and 14 reported in the state.....		310,771	349,323
NET ENROLLMENT IN PUBLIC SCHOOLS.			
Number between 4 and 20:			
Counties: Rural .....		171,506	165,894
State graded .....		45,765	45,964
Grades below the high school.....		44,573	41,881
High school .....		15,556	16,530
Total for counties.....		277,400	270,269
Cities: Kindergarten .....		20,423	12,772
Elementary .....		106,485	132,207
High .....		22,064	24,855
Total for cities .....		150,972	169,834
Total number between 4 and 20 enrolled in public schools.....		428,372	440,103
SCHOOLHOUSES.			
Number of schoolhouses in the state.....			8,018
Seating capacity of all the schoolhouses.....			520,376
TEACHERS.			
Number of men teachers employed.....		1,619	1,692
Number of women teachers employed.....		13,340	13,839

## COMMON SCHOOL FINANCES.

RECEIPTS.	1912-13.	1913-14.
Amount on hand June 30.....	\$4,284,796.69	\$4,330,405.04

## TABLE OF CONTENTS

---

<b>Forward</b> .....	<b>11</b>
<b>I. Census, enrollment and attendance</b> .....	<b>15</b>
1. What parents want to know.....	15
2. How many children.....	15
3. Where are they.....	18
4. How many go to high school.....	20
5. Is attendance regular.....	20
6. Making children attend.....	22
7. How many are promoted.....	25
8. How many leave school.....	27
9. How many graduate.....	27
<b>II. The teaching force</b> .....	<b>32</b>
1. The teacher a responsible agent.....	32
2. Teachers—where and how many.....	32
3. Today's teachers better educated.....	34
4. Third grade certificate disappearing.....	34
5. The masses and the classes.....	35
6. Salaries have gone up.....	38
7. Rolling stones.....	41
8. Teachers' pensions.....	41
<b>III. Special activities</b> .....	<b>42</b>
1. Facts and reformers.....	42
2. The library.....	42
3. Keeping children well.....	43
4. Helps to children's play.....	45
5. Free Textbooks.....	47
6. Kindergartens.....	47
7. Schoolhouses—old and new.....	48
8. The public and its school.....	49
9. Foreign languages in the grades.....	49
10. Industrial work.....	49
11. Miscellaneous .....	50

IV. The rural school.....	51
1. How important it is.....	15
2. What has been done.....	51
3. Laws still needed.....	53
4. Rural school progress in ten years.....	54
5. Consolidating country schools.....	57
6. The county superintendent and supervising teacher.....	58
7. The exceptional school.....	58
V. The high school.....	60
1. Growth of the past decade.....	60
2. The student body.....	60
3. Where students come from.....	62
4. Graduates, non-residents, etc.....	64
5. Size of classes.....	65
6. Industrial work.....	65
7. Students, failed, dropped, and promoted.....	66
VI. School finances.....	69
1. Sources of school money.....	69
2. State, county, and local money.....	17
3. Wealth.....	71
4. Wealth variation.....	74
5. Tax and wealth.....	74
6. Expenditure per capita—cities.....	78
7. Receipts and expenditures.....	80
VII. Other educational institutions.....	83
1. Introductory.....	83
2. The university of Wisconsin.....	83
3. The Normal schools.....	85
4. Other groups of schools.....	85
5. The continuation schools.....	86
6. Appendix.....	88

Note: Subjects are taken up in the appendix in the same order as in the body of the report. Pages 88 to 113 give general statistics. Pages 114 ff. give individual statistics for counties, cities, and high schools.

## TABLE OF ILLUSTRATIONS

Milk testing and play ground apparatus.....	59
14. Ten year high school comparison.....	61
15. Percent of eighth grade graduates entering high school....	63
16. Twenty-one millions for Wisconsin public education.....	70
17. Relation of wealth to school support.....	72-73
18. Analysis of school receipts.....	79
19. Proportion of teaching salaries to current school expenses..	82

## LETTER OF TRANSMITTAL

---

Department of Public Instruction,  
Madison, Wis., December 31, 1916.

HON. EMANUEL L. PHILIPP

*Governor of Wisconsin*

SIR:—I have the pleasure to submit herewith the Seventeenth Biennial Report of the Department of Public Instruction. I trust that in this report you will find an accurate summary of school conditions in Wisconsin and of the progress in education that has been made in this state, particularly in the last two years.

Very respectfully yours,

C. P. CARY,  
State Superintendent.

## II. THE TEACHING FORCE

### 1. The teacher a responsible agent

Once a little girl was brought up to the principal of a graded school for having torn her geography. On questioning her, the principal elicited this comment,—“It’s my teacher that ought to be punished for making me so mad that I had to tear my geography.”

The teacher is responsible for the conduct of the child in that she moulds character through wise or unwise guidance and example.

Although to place upon the shoulders of the teacher responsibility for all the sins and shortcomings of her pupils would be ill-considered, in very many cases she is at the bottom of outbreaks of disorder by making the children restless, or openly insubordinate through poor management. In many cases, she is responsible for their mental sins by giving them work unsuited to their stage of development or by teaching good work poorly.

The teacher is the main factor connecting the school system with the individual child. She is the chef and waitress combined, serving to the pupils a menu outlined by her superior officers, and she is largely to blame for any mental or moral indigestion resulting therefrom.

### 2. Teachers—where and how many?

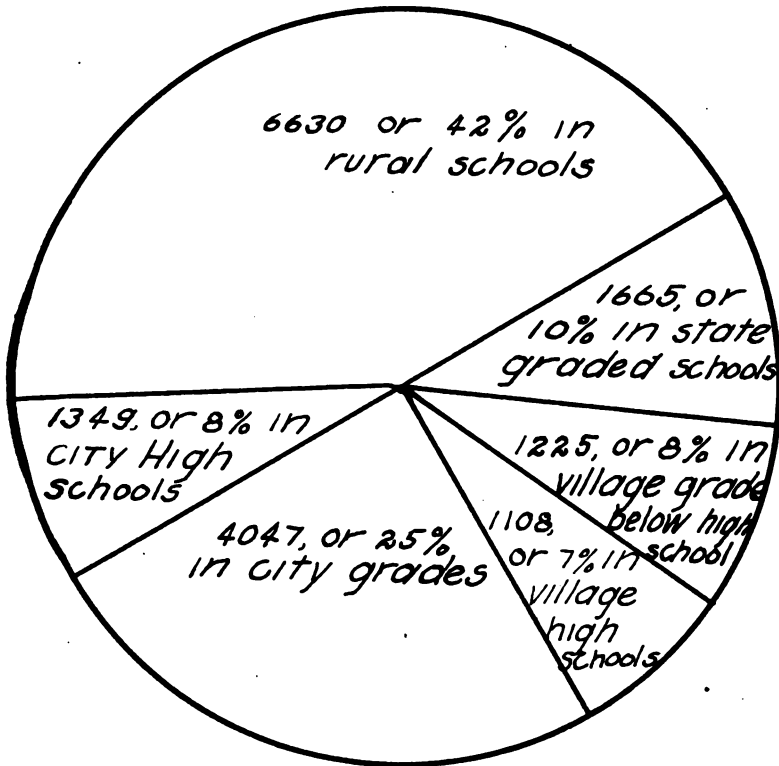

Plate 9 shows the distribution of the teaching force of the state of Wisconsin. It will be interesting to compare this with the distribution of enrollment in the following table:

**TABLE V**  
**Enrollment and teaching force**

	Per cent of enrollment	Per cent of teachers
Rural schools include -----	36	42
State graded schools include -----	11	10
Grades below high schools include -----	9	8
Village high schools include -----	4	7
City grades include -----	34	25
City high schools include -----	6	8

The distribution of enrollment does not follow the distribution of the teaching force with any exactness. The rural schools and village and city high schools have a greater proportion of teachers than of

Distribution of Public School Teachers  
1915-1916

Total 458102 teachers

enrollment. State graded schools and village and city grades have a smaller proportion. The meaning of this will be considered in another section in this chapter.

### 3. Today's teachers better educated

The teachers in Wisconsin schools today, particularly in the rural schools, are receiving more nearly adequate educational and professional training than has been the case at any other time in the history of the state. While there is not in Wisconsin any law which requires them to have a high school education or its equivalent, as a matter of fact by far the majority of country school teachers have had this training. County training schools and rural courses in normal schools receive many high school graduates or students with one, two, or three years of high school training.

A complete table showing educational qualifications of teachers in all groups of schools will be given in the appendix, tables M, N, and O. A brief summary of the educational training of country school teachers is given in the following table:

**TABLE VI**  
**Educational training of rural teachers**

	1914-15	1915-16	Gain
Total teachers rural schools -----	6, 643	6, 830	
No. with high school training or more--	3, 542	3, 788	
Per cent -----	53	57	4
No. with county training school education -----	1, 589	1, 764	
Per cent -----	24	27	3
No. with 8th grade education only ----	160	118	
Per cent -----	2. 4	1. 8	

### 4. Third grade certificate disappearing

Another means of checking up the increased education, particularly of country school teachers, is to note the decline of third grade certificates.

Ten years ago, a third grade certificate was deemed by many school boards adequate preparation to teach in a common school. In fact, there was not a supply of more highly trained teachers to fill the positions. Half or more of the teachers under county superintendents held only the third grade certificate.

The third grade certificate is becoming extinct as a teaching qualification in Wisconsin schools. The improvement is shown by the following table which includes all teachers in schools under county superintendents.

# EDUCATION IN WISCONSIN

---

## I. CENSUS, ENROLLMENT, AND ATTENDANCE

### 1. What Parents Want To Know

The first thing is to be sure that the child is being taught in some sort of school. He must be learning regularly, with school attendance broken only for valid reasons. He should do well in his studies, progress normally from grade to grade, and at the end graduate from the grades, and later from the high school.

These are the main considerations for parents in the education of their children. Good teachers, a good course of study, schools economically and yet efficiently managed, are contributory factors in the satisfactory progress of children through the school system. This is in the minds of parents the thing of primary importance.

The interests of the state in its relation to the schools are fundamentally the same as those of the parents. The state wishes to see as many children as possible in school. It is desired that these children attend as great a proportion of an adequate school year as possible, that unnecessary failures are eliminated, and that the largest possible number of children progress normally from grade to grade and graduate at the end of the school course. The teaching force, course of study, school libraries, school finances, school nurses, etc., are all parts of the human machine which is to bring forth an educated child population.

Therefore, it is quite proper that a report of the school system of Wisconsin should begin with a study of the children themselves—how many there are in the state, how many are enrolled in school and what are the conditions of the enrolled children's progress.

### 2. How Many Children?

The school census in Wisconsin is taken on the basis of the number of children from 4 to 20 years old, differing in this respect from the system in use in many other states. It will readily be seen that the percentage of children from 4 to 20 enrolled in the public schools will be much less than the percentage of children from 5 to 18 for example. The following table gives the relation of enrollment to census for the last four years.

Percentage of Children 4 to 20 years old enrolled in Public Schools

Counties 1915-16

 more than 70 per cent	 50 - 59 per cent
 60 - 69 per cent	 less than 50 per cent

### 6. Salaries have gone up

It may be stated without fear of contradiction that all teachers are underpaid. Ever since the first educational investigator thought of comparing their wages with those obtained by janitors, firemen, policemen, street cleaners, and other public servants in useful but scarcely intellectual callings, there has been a constant fire of criticism directed against the public which does not approximate its rewards to the training, service, and results demanded.

That teachers' wages are too low is a matter of common knowledge. In this discussion of the tangible rewards of teaching, therefore, emphasis will be laid rather on the improvement over past conditions than on the disparity between existing conditions and what ought to be.

Ten years ago 5,925 teachers or 61% of the total number in service in schools under Wisconsin county superintendents, received less than \$40 per month. In 1914-15 only 25 teachers or two-tenths of 1% of the total number in counties in the state received less than \$40 per month. These 25 teachers were not in any case full time teachers but were kindergarten assistants, music teachers, etc., who taught for a few hours each day.

In the cities the increase has been less marked, but there has been a definite increase, nevertheless.

This great difference in salaries, especially in the schools under county superintendents, within the past ten years is due in part to the minimum wage law of 1913. This law provides that a school cannot draw state aid unless the teachers were paid at least \$40 per month.

It has been said that the minimum wage tends to become the maximum wage. This is not the case in Wisconsin, because 44% of the teachers in Wisconsin schools received \$50 or over in 1914-15. Plate 10 interpreted by Table IX gives figures on teachers' salaries for the year 1915-16.

Teachers' Salaries 1915-16

PLATE 10

**TABLE IX**  
**Teachers' salaries 1915-16**

	Total	Rural	State graded	Grades below high school	Free high schools	City grades	City high school
Total.....	15,955	6,630	1,665	1,220	1,106	4,072	1,262
Less than \$40.....	101	3	1	6	6	80	5

\$100+.....	946	.....	31	4	291	140	482

**Total and Local Teaching Experience**  
**1915-16**

### 7. Rolling stones

Perhaps one reason why teachers' salaries are low is because of the brief tenure of office of teachers in public schools. The professional life of the average teacher is probably not more than 4 or 5 years. The length of service in a given locality is much less than this.

Undoubtedly, the fact that 81% of the professional workers in Wisconsin schools in 1915-16 were women, has something to do with the brief tenure of office in a given locality.

Considering the professional teaching life of the rank and file of teachers, can teaching be truly called a profession?

The "two-four-eight law" has done much to keep teachers in their positions for a longer term of years and will undoubtedly do more. Under this law teachers staying two years in a position, and doing efficient teaching work, are given a bonus of \$2.00 a month from the state fund. Teachers staying three years are given \$4.00 and teachers staying over three years increasing amounts for their service.

A total of 2,546 teachers received aid under this law in 1915-16. If these 1,701 received aid for teaching in a given position two years, 494 for teaching three years, and 351 for teaching four years or over. This law applies only to districts under county superintendents.

### 8. Teachers' pensions

Many teachers leave the teaching profession permanently within a few years after entering it. There are, however, a number of teachers who stay in the schools for 25 years and over,—who literally give their whole lives to the teaching profession.

It was to provide for the disability and superannuation of teachers such as these that the teachers' insurance and retirement fund law was framed. Under this law which went into effect on Sept. 1, 1911, teachers serving the state for a period of 25 years are rewarded by receiving an annuity of \$12.50 for each year of service. The fund is maintained by the joint contribution of the state and the individual. (See Appendix for detailed statistics of Teachers' Pensions.) It applies to all teachers in Wisconsin except those in the city of Milwaukee and those who at the time when the law was passed chose not to enter into the fund. At present it is obligatory for all teachers entering service in schools outside the city of Milwaukee.

### **III. SPECIAL ACTIVITIES**

#### **1. Facts and reformers**

An enthusiast over the school library will have you believe that the school consists of the library. An enthusiast for foreign language in the grades is similarly convinced that this instruction is the be-all and end-all of the school system. Similarly with the propaganda for industrial work, for physical training, penmanship supervision, warm lunches and so on. Far be it from us to call these activities unimportant. They are among the hall marks of the most advanced educational systems and will be intelligently considered and organized by wide-awake superintendents and principals.

Many students, reformers and other enthusiasts are unable to secure material touching their particular propaganda in the State Department of Public Instruction. Information is not received and compiled concerning a number of questions which are asked of the state office. For example, we have no information as to the names of the schools having victrolas; the names of schools having motion picture apparatus; the average yearly increase in school construction for the past twenty-five years; the relative standing educationally of small endowed colleges in the states of the north-central division, and a multitude of other questions which have been asked of the department.

We cannot satisfy all seekers after information. This chapter is an attempt to set forth as much definite and accurate information as is available on a number of topics properly grouped under the heading "Miscellaneous."

#### **2. The library**

The township library law of the state of Wisconsin provides that ten cents for each child of school age shall be set aside annually as a library fund. Besides this money the school board may make an appropriation for the school library. This law is mandatory except in certain specified instances, the most important of which is the city of Milwaukee, in which no school libraries are maintained, the public libraries being used entirely.

The township library law was first enacted in 1887, being optional at that time. The law was made mandatory in 1895. Approximately six times as many books were added to school libraries

in the first eight years after the law was made mandatory as in the eight years immediately preceding.

The total number of books in Wisconsin schools for the past four years is as follows:

Year	Cities	Counties
1912-13 -----		1, 295, 758
1913-14 -----	168, 087	1, 441, 341
1914-15 -----	177, 674	1, 617, 163
1915-16 -----	178, 235	1, 636, 473*

Seven cities did not report library data. Two reported that the public libraries were used in place of school libraries. (A complete school library table will be found in the appendix.)

There has been during the past year great activity in the organization and administration of reading circles both among teachers and young people. This work has been under the supervision of the State Reading Circle Board, whose secretary is Mr. O. S. Rice, State Department of Public Instruction. Bulletins and information regarding this work may be procured from the secretary on request.

### 3. Keeping children well

In 1914-15, 28 school nurses were employed in cities for all or a part of the school year, while 27 school physicians were connected with city school systems all or part of the time. In 1915-16 these figures were 30 school nurses and 25 school physicians.

The amount expended in cities on health supervision in 1914-15 was \$33,204.00 of which \$29,121.50 was spent for salaries of physicians and nurses. In 1915-16 the amount spent for this purpose in cities was \$39,519.40 of which \$35,716.40 was spent for salaries.

City schools in Wisconsin list a total of 44 days during which a whole school was closed through contagious diseases in 1915-16. Time was lost from this cause in 9 cities.

Four cities in Wisconsin maintained open-air schools—Milwaukee, Racine, Kenosha and Green Bay. Ungraded schools are maintained in a large number of cities. The list follows:

Appleton	Menomonie	Racine
Eau Claire	Merrill	Stevens Point
Green Bay	Milwaukee	Superior
La Crosse	Peshtigo	Wausau
Madison	Platteville	West Allis
Manitowoc	Prairie du Chien	

\* That the increase in 1915-16 is slight is probably due to the rebinding instructions given schools. Schools were requested to have dilapidated volumes rebound and to eliminate such material as was beyond repair.

## How Wisconsin is Protecting the Health of its School Children

PLATE 12

Wisconsin counties health work is far less advanced than in 1914-15 there were visiting nurses in two counties—Milwaukee and Sheboygan. In 1915-16, Polk and Dunn counties voted to employ school nurses but up to the end of the school year this was not accomplished. During the first few months of the school year 1916-17 a nurse was engaged in Dunn county and appropriations were voted for the same purpose in Chippewa and Waupaca counties. Plate 12 shows generally conditions with regard to health supervision in the various counties, cities and villages of Wisconsin. Data have been furnished for this purpose by the Wisconsin Anti-Tuberculosis Association which devotes a large part of its resources, all of which are secured by the annual sale of Red Cross Christmas Seals, to promoting tuberculosis prevention and support by communities of nursing service and health inspection in the schools.

#### 4. Helps to children's play

Playground apparatus is being secured by a large number of cities. In most of the cities some playground apparatus is to be secured. Although specific reports on this point have not been secured, in 1916 information was requested in the county superintendent's report on the number of schools having playground apparatus. One hundred and forty schools were reported, of which number 405 rural, 136 state graded and 99 village schools. This is undoubtedly a great advance over conditions in any previous year. Children must have space in which to play. The size of school grounds is an important matter in connection with child health and education.

Of the 7474 schools which reported,  
 report school grounds of one acre,  
 report grounds of more than an acre,  
 report grounds of less than an acre.

The number of rural schools in the various groups is as follows:

one acre,  
 more than an acre,  
 less than an acre.

Plate 13 shows school grounds and playground apparatus conditions graphically. If school boards would see to it that school grounds were of adequate size it would be of inestimable value in helping to play spirit among country, village and city children.

The following cities employ special teachers of physical training:

Adrian	Grand Rapids	Oshkosh
Albion	Green Bay	Racine
Appleton	Jefferson	Sheboygan
Baraboo	La Crosse	Superior
Beloit	Madison	Two Rivers
Berkeley	Manitowish	
Boscobel	Neenah	

Give the Children Space to Play

*Wisconsin Counties 1915-16*

**2920** *School grounds contain less than 1 acre*

**3639** *contain 1 acre*

**915** *contain more than 1 acre*

**640** *have play ground apparatus*

**5. Free textbooks**

Free textbook movement is undoubtedly growing in Wisconsin in both city and country schools. The following table shows the conditions in 1914-15 and 1915-16.

**TABLE X****Districts furnishing free texts 1914-16**

	1914-15	1915-16
Furnishing free texts in grades -----	35	40
Furnishing free texts in high schools---	30	33
Selling texts at cost-----	19	18
Printing texts -----	10	12
Total -----	2,918	2,871
Texts rural -----	2,562	2,499
Texts state graded -----	244	261
Texts high schools and grades below--	122	111

Cities in which all or practically all of the districts have are:

Forest	Polk
Iron	Price
La Crosse	Rusk
Langlade	Vilas
Lincoln	Washburn
Marathon	Wood
Marinette	
Oneida	

**6. Kindergartens**

One hundred kindergartens in 1914-15 and 98 kindergartens in 1915-16 are reported in schools under county superintendents. Of 1915-16, 34 were reported in state graded schools and 64 in cities. In the cities there are many more kindergartens, there were 100 in 1914-15 and 300 in 1915-16. The cities not reporting kindergartens are:

	Park Falls	River Falls
	Peshtigo	Stanley
	Platteville	Washburn
	Portage	Watertown
	Prairie du Chien	Whitewater
	Ripon	

**7. Schoolhouses—old and new**

In 1915-16 there were reported in the state of Wisconsin school buildings as follows:

Total in counties -----	7, 436
Rural school buildings -----	6, 690
State graded schools -----	607
Grades below high school in separate buildings -----	82
High school and grades below -----	290
High school only -----	38
Total in cities -----	489
High school only -----	37
Grades only -----	394
High school and grades -----	58
(Parochial and private school buildings) -----	(549)

In the biennial period 1914-16 a total of 362 school buildings were put up in districts under county superintendents. This is five per cent of all the school buildings in the state. Building activities varied considerably among the counties, there having been thirteen counties in which no new buildings whatever were erected during the school year 1915-16. These counties were:

Ashland	La Crosse	Vilas
Burnett	Lafayette	Washington
Dodge	Monroe	Wood
Florence	Oconto	
Kenosha	Ozaukee	

The cost of school buildings for the year 1915-16 was as follows

**TABLE XI**

191 school buildings cost -----	\$871, 133 45
Average -----	4, 561 00
134 rural school buildings cost -----	239, 629 00
Average -----	1, 785 00
46 state graded school buildings cost -----	401, 534 00
Average -----	8, 730 00
11 high school buildings cost -----	229, 970 00
Average -----	20, 906 00

In cities there was less building activity in the biennial period. Only ten buildings were reported as erected during the year 1915-16. Of these eight were graded buildings and two high school buildings.

Counties especially to be commended for advance building activity during the biennial period are:

Bayfield	Lincoln	Rusk
Brown	Manitowoc	Sawyer
Door	Marinette	Sheboygan
Forest	Milwaukee	Waupaca
Iron	Polk	
Langlade	Racine	

### 8. The public and its school

Items in the annual reports of county superintendents show the interest taken by the people in the community in the school and its activities. In 1914-15 there were 21,415 public gatherings in schoolhouses besides 2,893 in high schools. 17,622 visits by school officers and 97,347 visits by school patrons are reported for 1915-16.

It should seem that parents and school board members spend more time in doing nothing else but visiting school, it might be well to say that this amazing total includes, as a matter of fact, only seven to sixteen visits in each particular school, or perhaps one-tenth of the school year. Boiled down in this way, no one is staggered at the total of 104,969 school visits. No doubt many of these visits were on special days when programs were

held. Gatherings were held in 1915-16 in 5,180 schools, or over 90 per cent of the total number. Parents' day was held in a number of schools and, in general, coöperation between the school and the community received great impetus throughout the biennial.

### 9. Foreign languages in the grades

German is taught in the grades in five cities—La Crosse, Milwaukee, River Falls and Sheboygan. In River Falls, German is taught in the grades by a special practice teacher from the normal

schools—Milwaukee and River Falls—teach other foreign languages. In Milwaukee, Italian is taught in the Italian districts while in River Falls Latin is begun in the grades for children wishing to pursue this study in the high school. In 1914-15, 218 schools under county superintendents taught foreign languages; 183 taught German; 22 Scandinavian; 10 Polish, and some other foreign language.

### 10. Industrial work

Of the Wisconsin cities teach domestic science in the grades. The cities doing so are:

Lake Mills  
Onalaska  
Peshtigo  
Phillips

Prairie du Chien  
Superior

The list of cities not teaching manual training in grades is slightly longer and includes:

Ft. Atkinson  
Horicon  
Hudson  
Lake Mills  
Onalaska

Park Falls  
Peshtigo  
Prairie du Chien  
Waupaca

See

Five cities—Chippewa Falls, Janesville, Stanley, Stoughton and Waupaca—teach agriculture in the grades.

2,958 rural schools or 45 per cent of the total number in 1915-16 offered some form of hand work—manual training, cooking or sewing. 427 state graded schools or 69 per cent of the total number offered such work. In high schools industrial work was offered in 1915-16 as follows:

Manual training -----	120 schools
Domestic science -----	171 schools
Agriculture -----	84 schools
Commercial work -----	122 schools

In the grades below these high schools industrial work was offered as follows:

Manual training -----	100 schools
Domestic science -----	123 schools
Agriculture -----	31 schools

Industrial work of some sort was offered in about 75 per cent of the Wisconsin high schools in 1915-16.

#### 11. Miscellaneous

Eighty gymnasiums were maintained in 1915-16 in 52 out of the 80 cities under city superintendents.

A total of 615 special teachers were employed in cities to teach the following subjects:

Manual arts -----	148 teachers
Domestic science -----	146 "
Commerce -----	133 "
Teachers' training course -----	9 "
Agriculture -----	13 "
Music -----	50 "
Drawing -----	37 "
Music and drawing combined -----	35 "
Penmanship -----	16 "
Physical training -----	24 "
German -----	6 "
Defectives -----	5 "
Drawing and physical training combined ---	1 "

Librarians were maintained in 24 out of the 80 cities, 4 cities employing 2 librarians.

Seventy-seven truant officers are reported in 67 cities. In many cases the chief of police serves in this capacity.

There were in 1914-15, 647 women school board officers in the counties. Of these 554 served in rural, 51 in state graded, and 42 in free high school districts.

#### IV. THE RURAL SCHOOL

##### 1. How important it is

Over a third of Wisconsin school children, and 42% of Wisconsin teachers, are found in the one-teacher country schools. There were in 1915-16, 6,630 one-teacher schools under the supervision of 72 county superintendents and 81 supervising teachers. While conditions have greatly improved in the past ten years, the country teachers are still more poorly paid and as a rule more poorly educated than any other group of teachers in the state school system. Country children by reason of their isolation attend school for a shorter period of time and go on to high school less often than do children in other forms of school districts. The rural schools need more help and encouragement they can get. This help has, in the past, been liberally given through legislation, revision, and other aids. There is no indication that it will cease to flow in amount in the future.

##### 2. What has been done

When one studies the list of forward-looking laws which have been enacted and made effective in the state of Wisconsin during the past decade, it is impossible not to believe that the interests of the rural population vitally concern the people of Wisconsin. The legislature of 1915 passed one of the best of the series of rural laws, that provided for one or two supervising teachers in each county to supervise country schools.

The rural school laws for some time since have needed simplification and codification. Provision for this was made by the legislature of 1915, and the work of codifying is at present being done by the Department of Public Instruction in coöperation with the Revision of Statutes.

There is a list, by no means complete as to details, of the best rural education activities in the state of Wisconsin.

##### Some rural legislation effective in 1916

Supervising teachers  
 School board conventions  
 Provision for  
 Sanitation and equipment  
 Transportation  
 Consolidation  
 Industrial work in the state graded schools

COMMON SCHOOL COMMENCEMENT—BROWN COUNTY

Length of teaching service in schools outside of cities and villages  
Professional teacher training  
State graded schools  
Social centers  
Reading circles  
Condemnation of school buildings  
Minimum salary for teachers  
Minimum school term lengthened  
Compulsory education  
Rural high schools  
Nonresident tuition  
Professional teacher training required  
County training schools  
Teacher training in high schools  
Teachers' pensions  
State loans for buildings  
School libraries  
Winter and short term high school courses  
County nurses  
Traveling libraries for country communities

### 3. Laws still needed

There are a number of laws which are still needed for the benefit of the rural schools of Wisconsin in addition to the splendid body of legislation which has so far been passed.

There is at present insufficient provision for proper schoolhouse construction. No educational official has power to accept or reject proposed plans for new schoolhouses.\* County superintendents usually go over proposed plans for proposed buildings, but such building construction is not standardized or sufficiently supervised at present.

The extent of school sites is not defined so as to make them of adequate size.

The county superintendent's office is limited in many instances by lack of clerical hire, inadequate salary, and a too brief term of office.

It is urged that we perfect a modern system of teachers' institutes and that liberal provision should be made for these.

There are a number of people in isolated districts, especially in the northern part of the state, where children are far removed from any instruction. Especial attention should be given to these communities so that children will not grow up without school opportunities.

Exceptional children—those exceptionally gifted and those defective mentally—should be especially provided for.

---

\* The Industrial Commission must inspect plans of all public buildings for safety construction.

enrollment. State graded schools and village and city grades have a smaller proportion. The meaning of this will be considered in another section in this chapter.

### 3. Today's teachers better educated

The teachers in Wisconsin schools today, particularly in the rural schools, are receiving more nearly adequate educational and professional training than has been the case at any other time in the history of the state. While there is not in Wisconsin any law which requires them to have a high school education or its equivalent, as a matter of fact by far the majority of country school teachers have had this training. County training schools and rural courses in normal schools receive many high school graduates or students with one, two, or three years of high school training.

A complete table showing educational qualifications of teachers in all groups of schools will be given in the appendix, tables M, N, and O. A brief summary of the educational training of country school teachers is given in the following table:

**TABLE VI**  
**Educational training of rural teachers**

	1914-15	1915-16	Gain
Total teachers rural schools -----	6, 643	6, 630	
No. with high school training or more--	3, 542	3, 788	
Per cent -----	53	57	4
No. with county training school education -----	1, 589	1, 764	
Per cent -----	24	27	3
No. with 8th grade education only ----	160	118	
Per cent -----	2. 4	1. 8	

### 4. Third grade certificate disappearing

Another means of checking up the increased education, particularly of country school teachers, is to note the decline of third grade certificates.

Ten years ago, a third grade certificate was deemed by many school boards adequate preparation to teach in a common school. In fact, there was not a supply of more highly trained teachers to fill the positions. Half or more of the teachers under county superintendents held only the third grade certificate.

The third grade certificate is becoming extinct as a teaching qualification in Wisconsin schools. The improvement is shown by the following table which includes all teachers in schools under county superintendents.

DOMESTIC SCIENCE CLASS IN A STATE GRADED SCHOOL

TRANSPORTATION AT BUTTERNUT

## 5. Consolidating country schools

The laws of Wisconsin are especially favorable to districts wishing to consolidate and maintain schools jointly. Such districts may receive state aid:

- a. For the erection and equipment of school buildings
- b. For transportation
- c. For maintaining state graded schools or high schools

A special law makes it advantageous to a district to discontinue its own school and provide transportation for its children in some other school district, while retaining its own organization and receiving its share of the school money. \$150 special aid is given to districts wishing to try out consolidation in this manner.

Consolidation in Wisconsin has had a gradual and natural growth and development. Most of the cases of union of school districts have included only two or three single districts which have determined to maintain school jointly under two or three teachers.

When consolidation of this sort has taken place, the school is no longer called a rural school but is usually organized as a state graded school.\* After a time the state graded school may take on one, two, or three years of high school work. When four years of high school work are included and other state requirements are complied with (a vote of the electors, employment of qualified teachers, state approval of course of study, etc.) the school becomes a free high school.

If territory containing at least thirty-six square miles is organized as a high school district, it is known as a union high school district. The graded and rural schools in a union high school district remain organized as separate and distinct school districts. If less than thirty-six square miles are included in the high school district, the high school and grades are together known as a district free high school with grades below.

Town and union high schools in the state of Wisconsin are rural high schools. There were in 1915-16 fifty-eight such schools and the rapid growth in their number indicates the popularity of the idea.

The following table gives some idea of the transportation and consolidation which has been carried on in Wisconsin during the past biennium.

	1914-15	1915-16
No. of schools closed; children attending in other districts -----	96	101
No. of schools closed and of children transported -----	78	85
No. of wagons used -----	84	99
No. of children transported -----	609	635
No. of districts furnishing transportation for children to their own school -----	146	166
No. of children transported -----	2, 281	2, 351
No. of children for whom the district has paid tuition in other districts -----	2, 712	3, 036

\* Not all state graded schools are formed from consolidation of districts. Most of them arise from the increase of population in a single district.

**6. The county superintendent and supervising teacher**

County superintendents' salaries have been going up, but not sufficiently to meet the increased cost of living. In 1914-15, the average salary paid to county superintendents in the state was \$1,163; 1915-16, it was \$1,234. Forty-seven counties employed clerical assistants in 1914-15. In twenty-four cases, these were employed for a year of twelve months while in the others the employment was temporary.

The supervising teacher system, although but one year old at the close of the biennium 1914-16, has abundantly demonstrated its value to the rural schools of Wisconsin. Under this law 81 supervising teachers were employed in 1915-16, nine counties having two supervising teachers. These teachers were employed for ten months. Their average teaching experience in the various classes of schools was as follows:

Rural schools .....	5.7 years (for 81 teachers)
State graded schools .....	5.1 years (for 48 teachers)
City grades .....	4.9 years (for 36 teachers)
City high school .....	4.7 years (for 8 teachers)

The main work of these rural supervisors has been in the rural schools and as a body they are eminently fitted to help country districts.

Supervising teachers are employed at salaries ranging from \$60 to \$80 a month in addition to traveling expenses. 7,548 schools were visited by supervising teachers in 1915-16, 11,878 visits being made.

In August, 1916, a two weeks' conference and institute was held at Madison for supervising teachers during which time they were given suggestions and instruction in supervising methods in the various school subjects.

**7. The exceptional school**

In 1915-16, the following items were received from county superintendents' reports. These show forward work in many lines in which there will be, undoubtedly, a large increase from year to year.

**Special activities in rural schools  
1915-1916**

	Total	Rural	State graded	
No. of schools in which warm lunches have been furnished .....	1,050	837	186	1
No. of schools in which some hand work has been done .....	3,534	2,958	427	15
No. of schools having some playground apparatus .....	640	405	186	9
No. of schools in which some form of evening school has been held .....	71	43	11	17
No. of schools in which one or more special gatherings have been held .....	5,180	4,414	520	24
No. of schools in which some school credit for home work has been given .....	1,629	1,439	168	22

PLAY-GROUND APPARATUS AT WINTER

CLASS IN MILK TESTING—STATE GRADED SCHOOL

## V. THE HIGH SCHOOL\*

### 1. Growth of the past decade

The following table and graph show a few aspects of high school growth in the past ten years.

	1905-06	1915-16	Percentage increase
No. of high schools .....	256	353	38
No. of teachers .....	1,206	2,533	110
No. of pupils enrolled .....	27,090	47,228	74
No. of graduates .....	3,654	7,054	93
No. of nonresident pupils enrolled..	6,006	10,490	75

These few figures show a remarkable increase in high school activities in the state of Wisconsin. Ten years ago, for example, out of a school census of 763,436 children between four and twenty, 27,090 or 3½% were found enrolled in high school. Today out of a census of 801,456, 47,228 or practically 6% are found enrolled in high school. Ten years ago, 5.8 per cent of school enrollment was high school enrollment. Today 10.3 per cent is found in high schools.

### 2. The student body

In the year 1915-16, 47,228 pupils were enrolled in high school. This was the net enrollment, that is, excluding those leaving for other public high schools.

The following table shows the distribution of gross enrollment by classes, and the per cent of high school enrollment to be found in each of the several classes.

\* Statistics on the teaching force, per capita cost, and to some extent, enrollment of high schools, are included in other chapters under their respective heads. This chapter aims to include only points peculiar to high schools which have not been included elsewhere.

A Ten Year High School Comparison

Percentage Increase 1905-06 to 1915-16

**High school enrollment 1915-16**

	Number	Per cent of total
Total -----	49, 970	100
Freshman year -----	17, 289	34
Sophomore year -----	14, 322	29
Junior year -----	9, 906	20
Senior year -----	7, 892	16
(No. of those to graduate) -----	(7,054)	(14)
Specials -----	561	1

This table may be interpreted in either of two ways. The large percentage enrolled in the freshman year may be assumed to mean that more and more pupils are entering the high school from eighth grades. On the other hand, the small proportion of seniors may be assumed to mean, and probably does mean to some extent, that students drop out of the high school before completing the course. No statistics are available as to the number dropping from high school in the course of the year.

Later on in this chapter will be included a table showing the dropping of students from various subjects, which, in many cases, undoubtedly means a complete dropping out of school.

The mortality in high schools is high, and the lower classes include a far larger proportion of eighth grade graduates than was the case a few years ago. Both factors contribute to the high proportion of students enrolled in the freshman and sophomore years.

**3. Where students come from**

The number entering a high school for the first time is given in the 1915-16 principals' report as 15,795.\*

These were grouped according to the source from which they were drawn to high school. Here is the distribution.

**The freshman year**

	Number	Per cent
Total -----	15, 795	100
From local city elementary grades -----	9, 952	63
Elementary grades, other cities -----	350	2
State graded schools -----	1, 091	7
Rural schools not state graded -----	2, 808	18
Private or parochial schools -----	1, 594	10

\* The difference between this and the 17,289 freshmen reported in the preceding section is mainly to be explained by the large number of freshman failures.

*Percent of eighth grade graduates  
entering high school  
1915-16*

The total number of graduates in 1914-15 from the eighth grade in cities and villages maintaining high schools was reported as 12,154. If these figures are exact, it would mean that 85% of the eighth grade graduates in cities and villages enter high school. The per cent entering high school in the other groups is shown by the following table and graph.

**Per cent of eighth grade graduates entering high school 1915-16**

	Graduates	Entering high school	Per cent
Rural -----	6, 373	2, 908	<b>46</b>
State graded -----	2, 687	1, 091	<b>41</b>
Village -----	5, 922	5, 040	<b>85</b>
City -----	6, 232	5, 262	<b>85</b>

A large field for the activities of high school principals would appear to be the inducing of more rural and state graded school graduates to enter high school.

#### **4. Graduates, nonresidents, etc.**

Out of 7,892 students reported as enrolled in the senior year, 7,054 or 89% are listed as graduating. This includes 2,921 boys and 4,133 girls.

The distribution of boys and girls in enrollment is shown by the following table:

#### **1915-16**

	Number	Per cent
Total enrolled -----	47, 228	<b>100</b>
Boys -----	21, 481	<b>45</b>
Girls -----	25, 747	<b>55</b>
Total graduates -----	7, 054	<b>100</b>
Boys -----	2, 921	<b>41</b>
Girls -----	4, 133	<b>59</b>

Boys are dropping out of high school to a far greater extent than girls, and girls are entering high school to a far greater extent than boys.

Nine thousand three hundred seventy-seven nonresidents

were reported in 1914-15, and in 1915-16, this number increased to 10,490. Tuition charged in 342 high schools is as follows:

	Per week
1 high school charges -----	\$0.25
21 high schools charge -----	0.50
15 high schools charge -----	0.75
302 high schools charge -----	1.00
3 high schools charge -----	1.50*

The entire amount of tuition for the year 1915-16, collected or uncollected, was \$336,502.20.

The average time that it takes to complete a high school course is four years.

In order to graduate

405 students spent 7 half years or less  
5,570 students spent 8 half years  
518 students spent 9 half years or over

#### 5. Size of classes

Questions were asked in the annual report concerning the number of classes enrolling five pupils or fewer, six to ten pupils, etc. Ten thousand eight hundred and fourteen classes were reported. Two thousand and fifty enrolled less than 10 pupils while 462 enrolled 31 pupils or over.

The larger number of high school classes enrolling ten or fewer pupils is probably due to the large number of small high schools, those enrolling fifty pupils or fewer. There were eighty-eight such schools in 1915-16. These high schools are slowly getting established, and there is of necessity a large percentage of small classes in their cases.

#### 6. Industrial work

Industrial work in 1915-16 was given as follows:

	No. schools	No. enrolled
<b>Manual training</b>		
High school -----	120	5,731
Grades -----	100	7,789
<b>Domestic science</b>		
High school -----	171	8,235
Grades -----	123	7,736
<b>Agriculture</b>		
High school -----	84	3,124
Grades -----	31	859
<b>Commercial subjects</b>		
High school -----	122	8,141

\* These are independent high schools charging more than the legal rate for free high schools.

66      REPORT OF THE STATE SUPERINTENDENT, 1914-16.

The high school cost of instruction in special subjects was as follows (1915-16):

	Total	Per pupil
Manual training -----	\$156,666 39	\$27 40
Domestic science -----	140,536 80	17 20
Agriculture -----	60,159 15	19 30
Commercial subjects -----	126,643 98	15 60

Twenty-one schools operated a school plot in connection with agricultural work, and fourteen schools held an agricultural exhibit.

**TABLE XII**

**Cost of industrial education in public high schools, 1914-15**

	Amount	Per cent
Total cost of instruction -----	\$1,866,769 69	100
Total cost manual training -----	134,725 00	7.2
Total cost domestic science -----	124,538 00	6.6
Total cost agriculture -----	49,698 00	2.6
Total cost commerce -----	114,718 00	6.1

**7. Students failed, dropped and promoted**

Three tables have been made showing the number of pupils failed, dropped, and promoted in 15 school subjects in 75 high schools for the year 1915-16. The first table will show the proportion of "failed" and "dropped" records divided by boys and girls; the second by small and large high schools, and the third will give the detail for the individual subjects.

**TABLE XIII**

**Failed, dropped, promoted—high school subjects 1915-16**

**Table A—boys and girls**

	Number	Per cent
Total student hours -----	40,071	100
Boys -----	17,879	100
Girls -----	22,192	100
Total dropped -----	3,878	10

## VI. SCHOOL FINANCES

## 1. Sources of school money

The sources of school money are of two sorts—taxation and school fund income. Taxation sources may be divided into three parts—state, county, and local.

Wisconsin's income from the permanent school fund is very small, indeed, compared to the amount of money necessary to maintain the school system or even the state fund distributable to schools.

At least 95% of the state school money in Wisconsin comes from current taxation.

In this respect, Wisconsin differs from some other states of the Northwest. All of the Northwestern states secured their permanent school fund mainly from the sale of public school lands which were set aside by national legislation before the states had ceased being territories. One state, Iowa, has no school lands left, or practically none. Seven Northwestern states, Minnesota, South Dakota, Illinois, North Dakota, Michigan, Ohio, and Wisconsin, still retain a part of their school land, although Wisconsin and Michigan derive no appreciable income from it.

The variation in financial foresight of eight Northwestern states is shown in the following table:

TABLE XIV

## A comparison of state foresight

	Amount perm't pub- lic school fund	Income permanent school fund	Amount school land now held acres	Income school land	Total income perm't sources
Minnesota.....	\$25,162.123	\$1,050,359	735,000	\$846,172	\$1,896,531
South Dakota.....	13,180.493	527,220*	2,958,520	568,713	1,095,933
North Dakota.....	12,969,951	518,798*	1,419,623	284,000	802,798
Illinois.....	948,995	56,937	6,298**	618,963	675,900
Michigan.....	6,912,414	464,220	10,163	.....	464,220
Ohio.....	4,145,742	248,631	12,000	100,000	348,631
Iowa.....	4,804,446	216,518	.....	.....	216,518
Wisconsin.....	4,320,256	210,257	11,000	.....	210,257

\* Estimated.

\*\* Plus 66 city lots.

## 21 Millions For Wisconsin Public Education Where It Goes

\*Including-5131 fulltime students & 10,036 short course & extension students

\*Includes-County Training schools, County schools of Agriculture & Domestic Science, Continuation schools, Day schools, Deaf & Blind.

Wisconsin's income from permanent funds is less than one-ninth that of Minnesota, her nearest neighbor. It is less than that of any other state in the Northwestern group.

This may not be a bad thing. It is held by a number of people that the proper support of a system of schools is through the citizenry, and that this responsibility should be currently felt. The lack of a permanent school fund does not determine the worth of the school system, and it may be argued that the public will be more interested in its schools if it has to support them entirely.

## 2. State, county, and local money

The money to support the schools comes from the state, from the interest on invested funds, the county, and the individual locality, although the entire burden of each falls on the individual taxpayer of the state, except for \$200,000.00, which is derived from the state on corporations, about \$220,000.00 from the income on the common school fund, and approximately a similar amount from the interest on the permanent funds of the University and the Normal schools, and a relatively small amount coming from fees, donations, book sales, tuition, etc. Probably all the sources of the state school tax money find their way back to the pocket of the individual taxpayer.

Broadly speaking, about twenty-one millions of dollars were spent on public education in Wisconsin in the school year 1914-15. Of this seventeen millions were spent for the support of the public school system of the state. The rest went variously for the University, the normal schools, county training schools, county schools for agriculture and domestic science, schools for the deaf and blind, continuation schools. Plate 16 shows graphically the general distribution of school money in Wisconsin.

Of the seventeen millions spent in 1914-15 for public school education only 13% came from the counties, 50% from local school taxes, and 19% from the state. \* The remaining 18% comes from tuition, interest on school funds, rent or sale of textbooks, money borrowed, and other miscellaneous receipts.

## 3. Wealth

How much wealth is there behind the school system of the state of Wisconsin? In 1914-15, the assessed valuation of all property in the state was \$3,299,731,408. If the school system cost the state that year 21 millions, the cost would amount to a state tax of 7 mills. This includes 7/10 mill tax for the public schools, 3/8 mill tax for the university, 1/6 mill tax for the normal schools, and all the other special taxes for special state aids, as well as the property tax for school purposes, and the local tax. \*\*

State and county school apportionments are equal or practically so. The additional amount from the state included special aids to school districts. Considering receipts from special sources, this figure would probably be reduced somewhat.

There were in 1915-16, 801,456 children of school age. The assessed valuation of the state indicates a wealth of approximately \$4,120 per child of school age. The total wealth per enrolled child for the same year is approximately \$7,200.

State wide figures such as the foregoing do not serve to describe conditions in many localities. Just as the "average man" is a very uncommon individual, so the average school district from the point of view of wealth, number of children, and tax for school purposes, would probably be hard to find. We have said that the average community pays a tax for all educational purposes of six mills, has an assessed valuation per child of \$4,120, and a wealth per enrolled child of \$7,200. There are probably few individual communities in Wisconsin of which these figures would be true. They present generalizations for the state as a whole.

#### 4. Wealth variation

The country districts of Wisconsin are richer per child of school age than the cities. Dividing the total assessed valuation of the cities by the school census gives for the cities \$3,250. Dividing the total assessed valuation of the state outside of the cities under city superintendents by the school census gives a quotient of \$4,740. The assessed valuation per census child in the country thus exceeds that of the city by \$1,490.

Like most statistics, financial or otherwise, there are several possible means of interpreting the foregoing fact. We might say that since the counties are richer than the cities, they do not need to raise so large a proportion of their assessed valuation in tax money for the schools. On the other hand, it might be stated that since the counties are richer than the cities in assessable property, they have the opportunity to raise without difficulty much more per child of school age than the cities would be able to do.

If the latter interpretation is made, it must be confessed that the districts under county superintendents are not coming up to their possibilities in the matter of providing liberally for the education of the children in them. The average rate of taxation for local school purposes in the counties of the state is 1.9 mills. In the cities, it is 4.1.

There is great variation between individual counties and individual cities in the matter of assessed wealth per child of school age.

Each child in the city of Washburn has less than one-eighth the property valuation back of his education that the Elkhorn child has. In the counties, the child in Burnett county has about one-fourth the property advantages that the child in Douglas county has.

#### 5. Tax and wealth

The average local tax for school purposes in the state of Wisconsin is 2.4 mills. In the counties, it is 1.9 mills. In the cities, it is 4.1. Individual counties and cities vary widely from this average, and if the local tax levy for school purposes of every individual dis-

trict in the state of Wisconsin could be secured, it would be found that there are a large number of districts not levying any school tax, and many others taxing themselves up to fifteen mills or more for school purposes.

The poorer district must tax itself to a large per cent of its assessed valuation in order to maintain a standard school. The richer district does not need to tax itself heavily—in fact, frequently does not tax itself at all. In school finances, the old text is often applicable—"Unto him that hath shall be given."

In Plate 17 three curves are given which illustrate the variation among counties and cities in respect to the local tax burden for public school support. Counties and cities have been grouped according to assessed valuation per child of school age which is represented by the descending black line. Assessed valuation per enrolled child is represented by the dotted broken line, while the black broken line represents the variations in tax rate.

This chart shows that on the whole the tax rate tends to increase as the assessed valuation decreases—that is, the richer a county or city is, the less proportion of its wealth does it raise for school purposes. More interesting still is the variation shown. It is not necessarily true that taxes are low because of a community's wealth, or high because of its poverty. One of the poorest of the cities in wealth per child of school age has one of the lowest of the school taxes while several of the richer cities tax themselves to a very creditable amount in mills for the support of their schools.

In the city curves, there is a break in the dotted broken line where records were lacking for the city of Lake Mills.

Cities and counties are numbered and the key for individual cities and counties follows:

#### Counties

1 Douglas	24 Manitowoc	48 Trempealeau
2 Green	25 Vilas	49 Marquette
3 Walworth	26 Calumet	50 Dunn

## 64 REPORT OF THE STATE SUPERINTENDENT, 1914-16.

The total number of graduates in 1914-15 from the eighth grade in cities and villages maintaining high schools was reported as 12,154. If these figures are exact, it would mean that 85% of the eighth grade graduates in cities and villages enter high school. The per cent entering high school in the other groups is shown by the following table and graph.

**Per cent of eighth grade graduates entering high school 1915-16**

	Graduates	Entering high school	Per cent
Rural -----	6, 373	2, 908	<b>46</b>
State graded -----	2, 687	1, 091	<b>41</b>
Village -----	5, 922	5, 040	<b>85</b>
City -----	6, 232	5, 262	<b>85</b>

A large field for the activities of high school principals would appear to be the inducing of more rural and state graded school graduates to enter high school.

### 4. Graduates, nonresidents, etc.

Out of 7,892 students reported as enrolled in the senior year, 7,054 or 89% are listed as graduating. This includes 2,921 boys and 4,133 girls.

The distribution of boys and girls in enrollment is shown by the following table:

### 1915-16

	Number	Per cent
Total enrolled -----	47, 228	<b>100</b>
Boys -----	21, 481	<b>45</b>
Girls -----	25, 747	<b>55</b>
Total graduates -----	7, 054	<b>100</b>
Boys -----	2, 921	<b>41</b>
Girls -----	4, 133	<b>59</b>

Boys are dropping out of high school to a far greater extent than girls, and girls are entering high school to a far greater extent than boys.

Nine thousand three hundred seventy-seven nonresidents

were reported in 1914-15, and in 1915-16, this number increased to 10,490. Tuition charged in 342 high schools is as follows:

	Per week
1 high school charges -----	\$0.25
21 high schools charge -----	0.50
15 high schools charge -----	0.75
302 high schools charge -----	1.00
3 high schools charge -----	1.50*

The entire amount of tuition for the year 1915-16, collected or uncollected, was \$336,502.20.

The average time that it takes to complete a high school course is four years.

In order to graduate

405 students spent 7 half years or less  
 5,570 students spent 8 half years  
 518 students spent 9 half years or over

#### 5. Size of classes

Questions were asked in the annual report concerning the number of classes enrolling five pupils or fewer, six to ten pupils, etc. Ten thousand eight hundred and fourteen classes were reported. Two thousand and fifty enrolled less than 10 pupils while 462 enrolled 31 pupils or over.

The larger number of high school classes enrolling ten or fewer pupils is probably due to the large number of small high schools, those enrolling fifty pupils or fewer. There were eighty-eight such schools in 1915-16. These high schools are slowly getting established, and there is of necessity a large percentage of small classes in their cases.

#### 6. Industrial work

Industrial work in 1915-16 was given as follows:

	No. schools	No. enrolled
<b>Manual training</b>		
High school -----	120	5,731
Grades -----	100	7,789
<b>Domestic science</b>		
High school -----	171	8,235
Grades -----	123	7,736
<b>Agriculture</b>		
High school -----	84	3,124
Grades -----	31	859
<b>Commercial subjects</b>		
High school -----	122	8,141

\* These are independent high schools charging more than the legal rate for free high schools.

## VI. SCHOOL FINANCES

## 1. Sources of school money

The sources of school money are of two sorts—taxation and school fund income. Taxation sources may be divided into three parts—state, county, and local.

Wisconsin's income from the permanent school fund is very small, indeed, compared to the amount of money necessary to maintain the school system or even the state fund distributable to schools.

At least 95% of the state school money in Wisconsin comes from current taxation.

In this respect, Wisconsin differs from some other states of the Northwest. All of the Northwestern states secured their permanent school fund mainly from the sale of public school lands which were set aside by national legislation before the states had ceased being territories. One state, Iowa, has no school lands left, or practically none. Seven Northwestern states, Minnesota, South Dakota, Illinois, North Dakota, Michigan, Ohio, and Wisconsin, still retain a part of their school land, although Wisconsin and Michigan derive no appreciable income from it.

The variation in financial foresight of eight Northwestern states is shown in the following table:

TABLE XIV

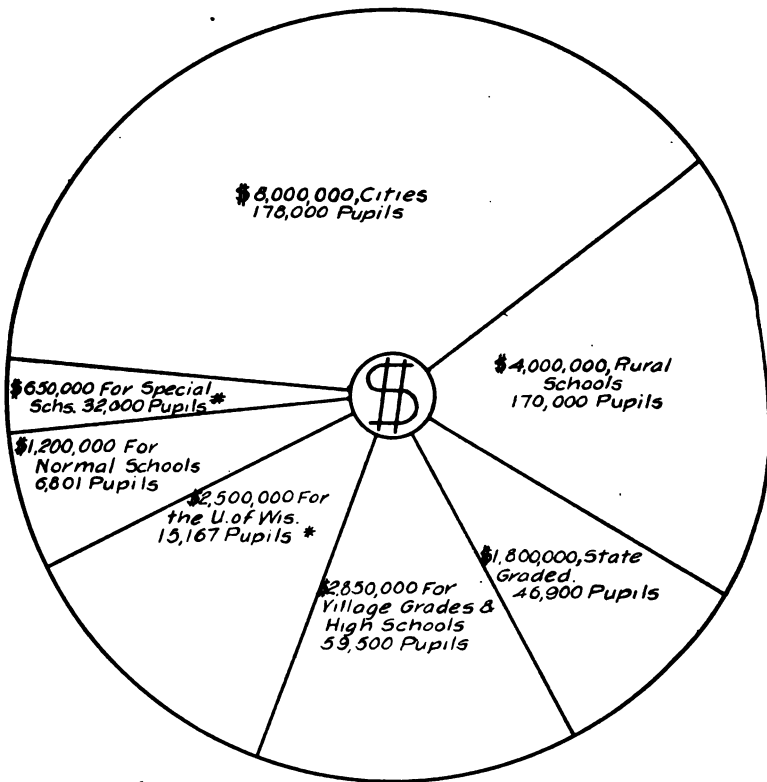

## A comparison of state foresight

	Amount perm't pub- lic school fund	Income permanent school fund	Amount school land now held acres	Income school land	Total income perm't sources
Minnesota.....	\$25,162,123	\$1,050,359	735,000	\$846,172	\$1,896,531
South Dakota.....	13,180,493	527,220*	2,958,520	568,713	1,095,933
North Dakota.....	12,969,951	518,798*	1,419,623	284,000	802,798
Illinois.....	948,985	56,987	6,298**	618,963	675,900
Michigan.....	6,912,414	464,220	10,163	.....	464,220
Ohio.....	4,145,742	248,631	12,000	100,000	348,631
Iowa.....	4,804,446	216,518	.....	.....	216,518

\* Estimated.

\*\* Plus 66 city lots.

## 21 Millions For Wisconsin Public Education Where It Goes

\*Including-5131 fulltime students & 10,036 short course & extension students

\*Includes-County Training schools, County schools of Agriculture & Domestic Science, Continuation schools, Day schools, Deaf & Blind.

Wisconsin's income from permanent funds is less than one-ninth that of Minnesota, her nearest neighbor. It is less than that of any other state in the Northwestern group.

This may not be a bad thing. It is held by a number of people that the proper support of a system of schools is through the citizen body, and that this responsibility should be currently felt. The size of a permanent school fund does not determine the worth of the school system, and it may be argued that the public will be more interested in its schools if it has to support them entirely.

## 2. State, county, and local money

The money to support the schools comes from the state, from the interest on invested funds, the county, and the individual locality, although the entire burden of each falls on the individual taxpayer of the state, except for \$200,000.00, which is derived from the state tax on corporations, about \$220,000.00 from the income on the common school fund, and approximately a similar amount from the interest on the permanent funds of the University and the Normal schools, and a relatively small amount coming from fees, donations, textbook sales, tuition, etc. Probably all the sources of the state school tax money find their way back to the pocket of the individual taxpayer.

Broadly speaking, about twenty-one millions of dollars were spent for public education in Wisconsin in the school year 1914-15. About seventeen millions of this were spent for the support of the public school system of the state. The rest went variously for the university, the normal schools, county training schools, county schools of agriculture and domestic science, schools for the deaf and blind, and continuation schools. Plate 16 shows graphically the general distribution of school money in Wisconsin.

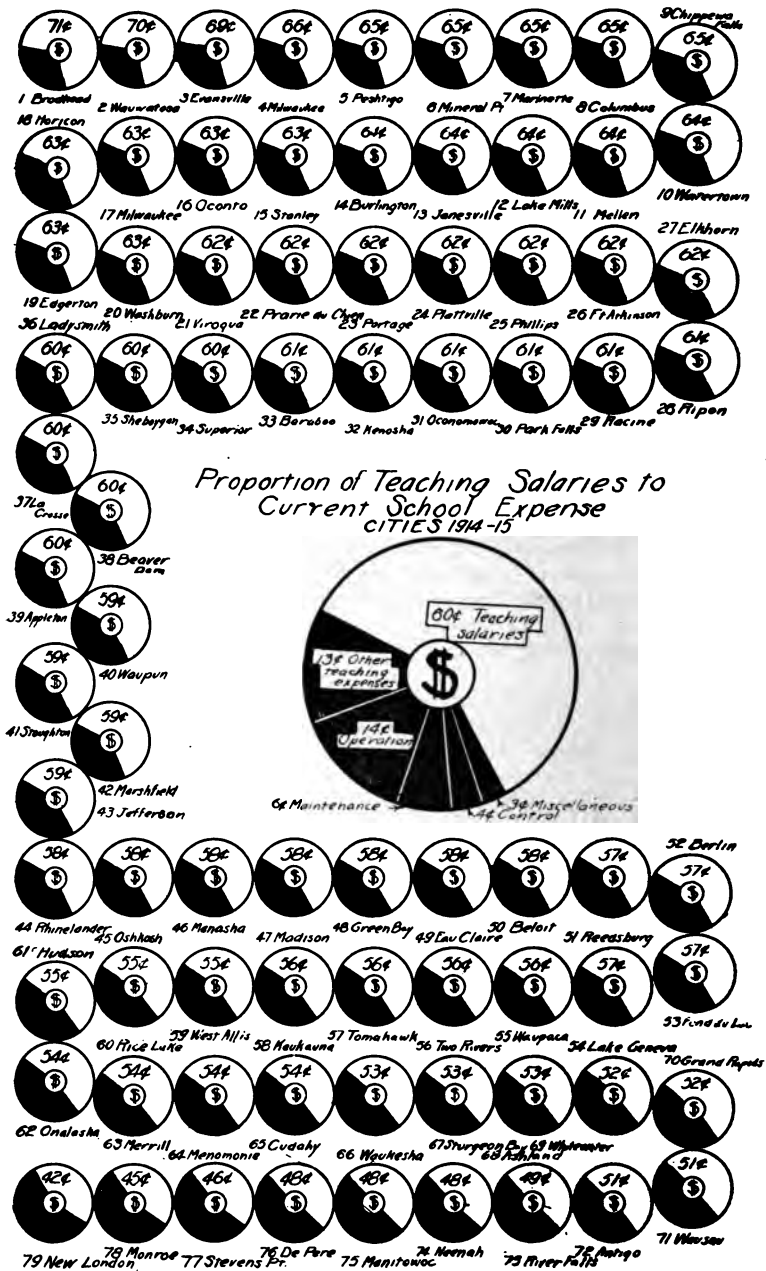

Of the seventeen millions spent in 1914-15 for public school education roughly 13% came from the counties, 50% from local school taxation, and 19% from the state. \* The remaining 18% comes from tuition, interest on school funds, rent or sale of textbooks, money borrowed, and other miscellaneous receipts.

## 3. Wealth

How much wealth is there behind the school system of the state of Wisconsin? In 1914-15, the assessed valuation of all property in the state was \$3,299,731,408. If the school system cost the state in that year 21 millions, the cost would amount to a state tax of 6.4 mills. This includes 7/10 mill tax for the public schools, 3/8 mill tax for the university, 1/6 mill tax for the normal schools, and all the other special taxes for special state aids, as well as the county tax for school purposes, and the local tax. \*\*

\* State and county school apportionments are equal or practically so. The additional 6% from the state included special aids to school districts.

\*\* Considering receipts from special sources, this figure would probably be reduced somewhat.

## VII. OTHER EDUCATIONAL INSTITUTIONS

### 1. Introductory

The chapters of this report so far have included only the great classes of schools directly under the supervision of city and county superintendents, and have excluded in the statistics figures from the county training schools, county schools of agriculture and domestic science, state normal schools, continuation schools in cities, schools for the deaf and blind, normal schools, universities and colleges, and privately endowed and administered institutions.

This chapter is an attempt to give in brief outline form some idea of the conditions of the other classes of public schools.

### 2. The University of Wisconsin

The following gives a summary of the student body and teaching force of the University of Wisconsin for the past biennium.

	1914-15	1915-16
(Graduate school*) -----	(492)	(484)
Letters and Science -----	2,970	3,159
Engineering -----	733	677
Agriculture -----	1,126	1,017
Law school -----	181	184
Medical school -----	96	103
School of music -----	102	92
Library school -----	38	34
Total -----	5,246	5,266
Deducting twice enumerated -----	118	135
Net total regular year -----	5,128	5,131
Summer session -----	2,599	2,784
Deducting students regular year -----	770	859
Revised total summer session -----	1,829	1,925
Short and dairy courses -----	639	538
Grand total excluding extension students -----	7,596	7,624
Extension division -----	7,158	7,543
Faculty members—total** -----	706	727
President and deans -----	9	9
Professors -----	89	88
Associate professors -----	55	58
Assistant professors -----	126	133
Lecturers (giving part time) -----	21	18
Instructors -----	237	244
Assistants (mainly half-time) -----	169	177

\* Counted under other heads.

\*\* Includes in 1914-15, 3, and in 1915-16, 6 faculty members on leave of absence for the academic year.

According to the biennial report of the University of Wisconsin, for the period 1914-16, there were, in 1915-16, 437.1 persons, or 60% of the total faculty giving full time to teaching work. This summary is based on the exclusion of all those members of the faculty not doing any teaching and dividing into tenths the time of those giving part of their time to other activities than teaching.

Features which were stressed in the biennial report of the University of Wisconsin were the activities of faculty committees, building needs of the university, and various miscellaneous activities and needs. Faculty committees were appointed as follows: a. Undergraduate instruction; b. Research, graduate and field work; c. The teaching of foreign language; d. Faculty organization; e. Faculty records; f. University physical plant.

The committee on undergraduate instruction recommended reports every two years by chairman of departments to their respective deans, setting forth the teaching methods in use in their departments and stressing any methods which might deserve special mention. This committee also devised an honor point system to make it impossible for students with barely passing marks in a large proportion of their subjects to graduate, and recommended that special attention be given to the exceptionally brilliant student.

The committee on research, graduate, and field work recommended a correlation of departments for graduate instruction by which duplicating courses might be avoided, alternation of small courses be more readily procured, and a more exact plan of work on the part of the student be possible.

The committee on foreign languages recommended a university course without foreign language requirement, which course has been adopted by the university.

Recommendations by the committee on faculty organization included a committee of five to examine generally questions of university policy, to examine specially questions arising from actions of boards and outside bodies, and to report annually to the faculty. The office of "Faculty Secretary" has been created as recommended and an administrative committee composed of the president, the deans, and the faculty secretary was recommended to compose a program for faculty meetings.

The work of the other two committees has not as yet been reported in detail. Other activities of the University of Wisconsin during the past biennium are the appointment of a dean of men, a referendum and legalization of student government, and increased attention to student health. It is urged in this report as a primary need of the university, that faculty salaries be increased. Increased funds for research are requested, the reinstallation of the department of art, and roughly \$850,000 for new buildings.

dict in the state of Wisconsin could be secured, it would be found that there are a large number of districts not levying any school tax, and many others taxing themselves up to fifteen mills or more for school purposes.

The poorer district must tax itself to a large per cent of its assessed valuation in order to maintain a standard school. The richer district does not need to tax itself heavily—in fact, frequently does not tax itself at all. In school finances, the old text is often applicable—"Unto him that hath shall be given."

In Plate 17 three curves are given which illustrate the variation among counties and cities in respect to the local tax burden for public school support. Counties and cities have been grouped according to assessed valuation per child of school age which is represented by the ascending black line. Assessed valuation per enrolled child is represented by the dotted broken line, while the black broken line represents the variations in tax rate.

This chart shows that on the whole the tax rate tends to increase as the assessed valuation decreases—that is, the richer a county or city, the less proportion of its wealth does it raise for school purposes. More interesting still is the variation shown. It is not necessarily true that taxes are low because of a community's wealth, or high because of its poverty. One of the poorest of the cities in wealth per child of school age has one of the lowest of the school taxes while several of the richer cities tax themselves to a very creditable amount in mills for the support of their schools.

In the city curves, there is a break in the dotted broken line where records were lacking for the city of Lake Mills.

Cities and counties are numbered and the key for individual cities and counties follows:

#### Counties

Douglas	24	Manitowoc	48	Trempealeau
Green	25	Vilas	49	Marquette
Walworth	26	Calumet	50	Dunn
Rock	27	Lincoln	51	Monroe
Milwaukee	28	Richland	52	Door
Lafayette	29	Florence	53	Wausara
Dodge	30	Ozaukee	54	Pepin
Jefferson	31	Forest	55	Jackson
Dane	32	Eau Claire	56	Wood
Iowa	33	Iron	57	Marathon
Racine	34	St. Croix	58	Adams
Kenosha	35	Outagamie	59	Clark
Winnebago	36	Oneida	60	Portage
Waukesha	37	Buffalo	61	Rusk
Fond du Lac	38	Kewaunee	62	Juneau
Columbia	39	Brown	63	Price
Green Lake	40	Langlade	64	Polk
Grant	41	Waupaca	65	Marinette
Sheboygan	42	Pierce	66	Shawano
Sawyer	43	Ashland	67	Taylor
Sauk	44	Crawford	68	Washburn
Washington	45	Bayfield	69	Oconto
La Crosse	46	Vernon	70	Barron
	47	Chippewa	71	Burnett

might have been expected, owing to the fact that the agriculture course in the public high school has been considerably developed during the past few years.

Schools for the deaf and blind have made steady progress during the period 1914-16, and statistics for these schools as well as the other classes of schools mentioned in this section will be found in the appendix.

### 5. Continuation schools

Continuation schools are at present maintained in twenty-nine Wisconsin cities. Their growth has been considerable during the past biennium, and is shown by the following table.

#### The continuation schools

##### 1914-15

	Industrial	Commercial	Continuation	Evening	Total
No. of Schools.....	23	7	27	28	85
Attendance.....	2,465	600	8,618	16,531	28,214
Disbursements.....	\$30,576.84	\$13,610.47	\$150,674.71	\$137,490.36	\$382,352.38
State aid.....	39,515.34	5,705.23	37,090.27	44,458.44	125,759.28
Per capita cost.....	32.68	22.68	17.48	8.32	13.55

##### 1915-1916

	Industrial	Commercial	Continuation	Evening	Total
No. of Schools.....	24	11	27	28	90
Attendance.....	4,303	938	14,284	17,176	36,701
Disbursements.....	\$103,075.94	\$19,116.80	\$194,017.20	\$141,658.59	\$457,868.53
Per capita cost.....	23.95	20.38	13.58	8.24	12.45

Cities maintaining these schools are:

1914-15		1915-16	
West Allis	Janesville	Menasha	Eau Claire
Menasha	Madison	Neenah	Madison
Grand Rapids	Chippewa Falls	Grand Rapids	Manitowoc
Beloit	Marinette	West Allis	Beaver Dam
Stevens Pt.	Cudahy	Beloit	Chippewa Falls
Neenah	Sheboygan	Fond du Lac	Cudahy
Fond du lac	Racine	Appleton	Shelbygan
Two Rivers	Manitowoc	Stevens Pt.	Superior
Marshfield	Beaver Dam	Two Rivers	Milwaukee
Green Bay	So. Milwaukee	Marshfield	Racine
Appleton	Menomonie	Green Bay	Menomonie
Wausau	Superior	Kenosha	Oshkosh
Eau Claire	La Crosse	Janesville	So. Milwaukee
Kenosha	Oshkosh	Wausau	Marinette
	Milwaukee		La Crosse

A summary of the finances of the continuation schools will be found in the appendix. The average tax levy for maintenance was 0.768 mills in 1915-16, and 0.413 in 1914-15. The average attendance was one person in twenty-two of the population in the cities in 1915-16, and one person in twenty-nine of the population in 1914-15.

## APPENDIX

In this appendix are given all statistics for counties, cities and high schools which were tabulated in the state department of Public Instruction, with the exception of a few where data were obviously faulty. The report blanks of 1915-16, particularly county and high school, included some points which were not included in the report of 1914-15. On these points, therefore, no statistics are given for the first year of the biennium.

It will be necessary to distinguish carefully between the groups of schools, and for this purpose, the following brief set of definitions has been compiled. These are intended to be generally correct rather than legally exact and complete:

**City schools:** Schools under city superintendents. There are eighty of these in the state of Wisconsin. They are separated, not by their size or incorporation into a city for municipal purposes, but by the form of their school administration.

**County schools:** Schools which report annually to county superintendents, including a few incorporated cities not under city superintendents together with all rural, village, state graded schools and high schools in territory not under city superintendents.

**Free high schools:** When this group appears under the heading "county schools", it includes only those high schools found in districts reporting to county superintendents.

**Village schools:** Includes free high schools and grades below where not under city superintendents.

**Rural schools:** In the main, these are one-room country schools although a few schools with two teachers are included where the enrollment is not sufficient, or other state requirements have not been met to make them state graded schools.

**State graded schools:** These are schools with two or more teachers, a minimum enrollment per teacher, teachers with specified qualifications, offering graded work through the eighth, and optionally the ninth, tenth, and eleventh grades. All consolidated graded schools are grouped in this class which includes at present a total of over six hundred schools.

## APPENDIX

## 86 REPORT OF THE STATE SUPERINTENDENT, 1914-16.

might have been expected, owing to the fact that the agriculture course in the public high school has been considerably developed during the past few years.

Schools for the deaf and blind have made steady progress during the period 1914-16, and statistics for these schools as well as the other classes of schools mentioned in this section will be found in the appendix.

### 5. Continuation schools

Continuation schools are at present maintained in twenty-nine Wisconsin cities. Their growth has been considerable during the past biennium, and is shown by the following table.

#### The continuation schools

##### 1914-15

	Industrial	Commercial	Continuation	Evening	Total
No. of Schools.....	23	7	27	28	85

## APPENDIX

In this appendix are given all statistics for counties, cities and high schools which were tabulated in the state department of Public Instruction, with the exception of a few where data were obviously faulty. The report blanks of 1915-16, particularly county and high school, included some points which were not included in the report of 1914-15. On these points, therefore, no statistics are given for the first year of the biennium.

It will be necessary to distinguish carefully between the groups of schools, and for this purpose, the following brief set of definitions has been compiled. These are intended to be generally correct rather than legally exact and complete:

**City schools:** Schools under city superintendents. There are eighty of these in the state of Wisconsin. They are separated, not by their size or incorporation into a city for municipal purposes, but by the form of their school administration.

**County schools:** Schools which report annually to county superintendents, including a few incorporated cities not under city superintendents together with all rural, village, state graded schools and high schools in territory not under city superintendents.

**Free high schools:** When this group appears under the heading "county schools", it includes only those high schools found in districts reporting to county superintendents.

**Village schools:** Includes free high schools and grades below where not under city superintendents.

**Rural schools:** In the main, these are one-room country schools although a few schools with two teachers are included where the enrollment is not sufficient, or other state requirements have not been met to make them state graded schools.

**State graded schools:** These are schools with two or more teachers, a minimum enrollment per teacher, teachers with specified qualifications, offering graded work through the eighth, and optionally the ninth, tenth, and eleventh grades. All consolidated graded schools are grouped in this class which includes at present a total of over six hundred schools.
